IATDMCT

Our Future is Brighter Than Ever Thanks to the Initiatives of our Scientific Committees

ALTERNATIVE SAMPLING STRATEGIES
- Guidelines on dried blood spot validation from a non-regulatory perspective
- Proficiency testing program for dried blood spot analysis

ANTI-INFECTIVE DRUGS
- Publish white paper on study design to evaluate anti-infective TDM
- Publish guidelines for high priority anti-infective drugs
- Increase member participation on related international committees

CLINICAL TOXICOLOGY / DRUGS OF ABUSE
- To actively contribute articles to the Compass newsletter
- To participate in joint meetings with other relevant societies

IMMUNOSUPPRESSIVE DRUGS
- A review article on generic immunosuppressive drugs and TDM
- Update tacrolimus consensus document
- Preparation of standardized LC-MS methods for TDM of biologics

PHARMACOGENETICS (PGX)
- Develop educational materials
- Prepare guidance manuscript
- Perform survey on PGx clinical use

PHARMACOMETRICS
- To have transversal activities with other committees of IATDMCT
- To develop & share educational tools about clinical pharmacokinetics
- To actively participate in joint meetings with other societies

STANDARDS OF PRACTICE
- Support regional TDM meetings with speakers
- Provide TDM advice and educational support to regulatory and professional bodies
- Support the 2017 meeting with workshops and roundtables

TDM IN ONCOLOGY
- Consensus guideline document for TDM of 5-Fluorouracil
- Consensus guideline document for TDM of Imatinib
- Support the 2017 meeting with workshops and symposia

YOUNG SCIENTISTS
- Initiate a YS exchange program sponsored by IATMDCST
- Increase YS representation on scientific committees
- To enhance contact opportunities between YS and TDM/CT specialists

LEARN MORE
- Visit https://iatdmct.org/scientific-committees.html to learn more about these committees, their initiatives and how you can become involved.
