Interview with Rafael Lanaro

The theme for this year's congress is 'TDM and Clinical Toxicology in a Globalized World' and in addition to some great plenaries around the theme, there are dedicated parallel sessions such as '[TDM in developing countries](#)' on Tuesday. Not only is this the first IATDMCT congress in Latin America, it is also the first time in the 29 year and 16 [congress history](#) that our host country is a developing country. I congratulate co-chair Rafael Linden for shining the spot-light on the challenges many countries face, but in this light we also see the many ways we all overcome these challenges. This month's interview with Rafael gives a taste of what's to come at the congress. See you in Brazil!
